

Appl. No. 10/620,117  
Amdt. dated April 10, 2006

Reply to Office Action of January 27, 2006  
Attorney Docket 12618

**AMENDMENTS TO THE SPECIFICATION**

Please amend the paragraph starting on page 6, line 26 and ending on page 7, line 2 as follows:

The construction and operation of the bubbler assembly 31 is illustrated and described in detail in the co-pending application Serial No. \_\_\_\_\_, filed \_\_\_\_\_ and assigned to the same assignee as the present invention. Since it is the construction and operation of the bubbler assembly 31, as well as the cooperation of the grain tank 20 and loop conveyor assembly 28, form no part of the present invention, they are not discussed in detail here. However, a general explanation of the manner in which they cooperate is desirable in order to insure a thorough understanding of the invention.

Please amend lines 28-29 on page 7 as follows:

Grain fed into the tank 20 from the loop elevator assembly 28 through the bubbler assembly 31 falls into both sides 55 and 56 of the tank 20-end.
